3-TIER Shipping Timelines

Order Cutoffs & Estimated Delivery

3-Tier states do not allow wine to be shipped directly to a consumer under certain circumstances. Instead, they require that the wine be sold from an out of state shipper to an in-state wholesaler and an in-state retailer prior to being sold to a consumer. Each of these "tiers" is required to be licensed. WineDirect fulfills orders lawfully to 3-Tier states by arranging for the wine to be sold via licensed wholesalers and retailers in each destination state, with fees being paid to each participant for its services.

WineDirect's 3-Tier network provides access to states not open for direct shipment or as an alternative in states that direct shipper permits may be cost prohibitive. WineDirect's comprehensive 3-Tier solution includes label registration and price posting checks, cash disbursement and reporting.
